

# Willocott® CE-0120

The thinnest - 0.48 mm - neurosurgical patty

# Willocott® CE-0120

The thinnest - 0.48 mm - neurosurgical patty

## Product description Willocott®

**Willocott®** neurosurgical patties are constructed of 100% high-quality natural cotton fibres. All neurosurgical patties have a thread attached to ease the postoperative count verification.

**Indications** Willocott® neurosurgical patties are used for the protection of tissue and the absorption of fluids during neurosurgery and other surgical interventions.

**Sterility** This product is only meant for single use, resterilisation is not permitted. Use an aseptic procedure in all phases of the treatment. Will-Pharma is not responsible for packages that have been resterilised. Will-Pharma does not accept any liability for packages that have been opened but not used.

If you have received Willocott® neurosurgical patties in an unopened and undamaged package it will remain sterile until the expiry date printed on the packaging or until the package is opened.

If you have received this product in an unsealed paper bag and/or as part of a modified procedure pack, Will-Pharma is not responsible for proper sterilisation; this responsibility lies entirely with the packager or distributor in question.

**Use** Willocott® neurosurgical patties can be used dry or can be moistened with sterile water or physiological saline. To make counting and verification easy, the neurosurgical patties can be replaced on the counting card after removal from the surgical field.

**Guarantee** Will-Pharma guarantees that these medical disposables are free of defects in terms of material and manufacturing faults. The above guarantees replace all other guarantees, whether explicit or implicit, including any guarantee of marketability or suitability for a particular purpose. Suitability for use of this medical device for a surgical intervention is determined by the user. Will-Pharma cannot be held liable for incidental damage or consequential damage of any kind.

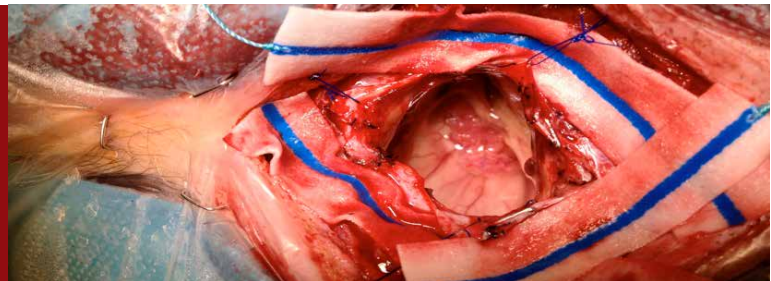

Willocott® is a registered trademark of Will-Pharma.

The thread attached to the patty is meant for identification purposes.

**Batch numbering** All Willocott® packages are printed with an EAN code and a batch number. The patties are manufactured under ISO 13485 conditions and fulfil the guidelines associated with CE certification.

**Quality** The quality requirements of Will-Pharma fulfil the ISO 9001 standards, and the manufacturing requirements of the patties fulfil the ISO 13485 standard. To maintain these high quality requirements, audits are done regularly.
